

Project: _____	Reseller Name: _____
----------------	----------------------

MINUS CUSTOM MATERIALS

The Minus One, Minus Two and Minus Three downlights are intended for drywall installation, but are designed to allow installation in a variety of different materials. As with any custom installation, there are limitations. To determine if an installation within your desired material is possible, please fill out the questionnaire below and return it to your authorized Minus reseller for consideration.

All fields are required to be completed in detail. Supporting documents are encouraged, but do not substitute as answers.

Fixture / Location

- | | |
|---|-----------------------------|
| 1. What Minus fixture are you planning on installing? (circle one) | Minus One / Minus Two |
| 2. Where are you planning on installing this fixture? (circle one) | Interior / Exterior |
| 3. If you selected exterior for question 2, is the structure open or closed? (circle one) | Open / Closed |
| 4. Is this for new construction or retrofit construction? (circle one)
Construction | New Construction / Retrofit |
| 5. Is the ceiling a plenum/air return ceiling? (circle one) | Yes / No |

Material

- | | |
|--|---|
| 6. What material are you planning to install the fixture in? | _____ |
| 7. Does the desired material have any certifications/listings? (circle one) | Yes / No |
| 8. If you answered yes to question 7, what certifications/listings does the material have? | _____ |
| 9. What is the total thickness of the desired material? (Complete in detail) | Thickness: ____Inches (____cm) |
| 10. What are the dimensions of the desired material? (Complete in detail) | Length: ____Inches (____cm)
Width: ____Inches (____cm) |
| 11. Does the ceiling material have additional backing material? (circle one) | Yes / No |
| 12. If you answered yes to question 11, what is the backing material? | _____ |
| 13. What is the total thickness of the backing material? | ____Inches (____cm) |

Installation / Safety

- | | |
|--|-----------------|
| 14. Can your installer route and/or cut the material according to shop drawings? (circle one) | Yes / No |
| 15. Will the desired fixture location have a one foot clearance from anything other than building materials? | Yes / No |
| 16. Will the fixture be submerged under water? (circle one) | Yes / No |
| 17. What is the target installation date? | _____ |
| 18. How many fixture's require this special installation? | Quantity: _____ |

I understand that the Minus is a certified low voltage class 2 fixture and that I am fully responsible to conform to all NEC codes and all local codes when installing in the desired special material. I have completed the questionnaire to the best of my ability and understand that installation within the special material may not be possible. I acknowledge that the Minus series fixture is intended for drywall installation and Apure Distribution, LLC and its authorized resellers are not responsible for improper installation, code violations, or any damages resulting from special material installations both structural or monetary.
