

UNIVERSAL DRYWALL BRACKET

Description

The Universal Drywall Bracket allows for easy installation of Minus Series fixtures within existing and new drywall ceilings or walls. The bracket kit includes a pre-cut ferrocement board for the specified Minus fixture to be installed onto. The ferrocement board is then fastened to the bracket until it is flush with the existing drywall. The drywall is then finished and painted as desired.

Construction

- Formed steel frame
- Includes screws for mounting to existing drywall
- M5 Hardware
- The UN Construction board is constructed of gypsum ferrocement and is pre cut to fit the required cutout in your drywall with .08" (2.2mm) allowance for taping, plastering and finishing.

Trimless Recessed Installation

- The Minus Universal Drywall Bracket and hardware allows for trimless installation of the Minus Series into existing drywall ceilings/walls or during new construction.
- Designed to provide precision alignment through the use of slotted holes.

Listings

- UL Listed, CE Conform
- Suitable for dry and wet locations
